

GIEOM

SOFTWARE
THAT DRIVES
ENTERPRISE
PRODUCTIVITY

Founded in 2012, GIEOM is the world leader in Enterprise Change Management software products. The company has since diversified into products that helps its customers simplify managing Risks, Compliance & Controls. The Products use Artificial Intelligence techniques such as Computer Vision and NLP. GIEOM enjoys the confidence of over 500,000 business users across 50+ countries globally, including the World Bank (US) and the State Bank of India (Worldwide).

OUR PRODUCTS

Manage change and train employees better

- Document all the information your employees need in one place: pin forms and other essential documents to process maps.
- The Ops Analyzer enables businesses to identify how changes in one business element will impact other business elements.
- Self-directed learning
- Missed the memo? Context-sensitive notifications inform employees of relevant changes directly on the transaction screen.
- Simple and easy to integrate with any IT system.

Allows businesses to convert external regulatory & policy documents into valuable internal policies that enable employees rather than confusing them

- Experience a significant reduction in regulatory non-compliance.
- Analyze your business to ensure every regulatory change is reflected in your system.
- Quickly communicate changes in policy to the affected departments and personnel.
- Automatic text conversion and search tool features

Enables businesses to define, measure, and manage operational risks for process steps that are impossible to automate

- Controls reduce human error and compliance breaches.
 - Compliance verification is quicker and easier.
 - Track the effect controls have on key business metrics.
 - Operational risks can be monitored.
 - Organization is always audit ready.
-

Uses machine learning and computer vision to verify digitized customer identification documents and paper based application processing forms

- AI-powered document-checking with high accuracy.
- Increase in verification speed improves turn-around-time.
- Switch staff from document verification to value-added tasks.
- Discourage and detect fraudulent activity
- Programmed to verify a wide range of KYC documents, including driver's license, passport, and voter ID.

THE ABOVE PRODUCTS ARE USED IN VARIOUS BUSINESS SCENARIOS

TECHNOLOGY TRANSFORMATION

Empowers organizations to seamlessly implement new IT systems, ensuring that new features can be used effectively from the moment you go live.

DIGITAL CHANGE MANAGEMENT

Increase Business Efficiency Through Standard Operating Procedure (SOP) Digitization. Single platform for drafting, reviewing, approving & publishing procedures.

CONTEXTUAL eLEARNING

Increase the Efficiency and Effectiveness of Your Training. Create sophisticated courses using training videos and practice sessions and then test and certify users.

ENTERPRISE POLICY MANAGEMENT

Convert long, complicated external policies into short, readable internal policies. By keeping staff informed, businesses ensure they remain compliant.

COMPLIANCE & RISK MANAGEMENT

Reduce Your Operational Errors and Compliance Breaches. Helps businesses define and measure the controls necessary to reduce risks.

AUTOMATED DOCUMENT VALIDATION

Use machine learning and computer vision to digitize and verify digitized KYC documents and paper based application processing forms.
