

NEED A WAY TO ANTICIPATE AND MITIGATE RISK TO MANAGE YOUR ENTERPRISE-WIDE COMPLIANCE?

We are all aware of how the business environment is always changing and new regulations are issued on a regular basis. Why? Because the possibility of legal sanctions, fines, or failure to comply with any rules and regulations is increasing, it is more important than ever for businesses to follow policies and do so in a timely manner.

Without adapting to the new policies, reaching your goals can take a long time and be quite costly. Integrating a monitoring mechanism through compliance assurance is one way to mitigate these concerns.

Therefore, organizations need to accommodate the various types of compliances across different policies. Meeting regulatory standards, frameworks, and laws is important so that your business runs smoothly and with the utmost integrity.

By meeting these regulatory requirements, you not only create a positive business reputation but also protect your employees, customers, and stakeholders from it.

NOW HANDLING THAT CAN BE A HUGE TASK TO TAKE ON!

Our product **Risk Central** provides you with a convenient way to stay ahead in managing your compliance by easily accessing your status on the dashboard.

How will this **really benefit your business?**

Risk Central Highlights

- **Track and monitor** your enterprise-level compliance status and a checklist to be up to date
- Bring compliance teams, compliance owners, and the management on the **same platform**.
- Get enterprise-level, location level, risk category level, department level, and law level status of compliance.
- **View compliances along with their proof** and list of non-compliances if any. Initiate transparency and confidence in certifying compliances at all levels.
- The single-window interface allows compliance owners to view a list of compliances required to comply in a week, a month, or a quarter. Update compliances as complied and upload proof.
- Automatic compliance reminder keeps compliance owners updated on upcoming compliances.
- Create compliance certificates at all levels to certify the compliances/non-compliances. Build transparency and confidence in issuing compliance certificates.
- A compliance report gives complete compliance-related information such as compliance due date, compliance owner, compliance status, and much more.
