DO YOU FIND IT DIFFICULT TO COORDINATE YOUR INCIDENTS IN REAL-TIME?

Well, worry not! Incident Management helps you find the right response to manage your incidents in real-time, all the time.

YES, YOU HEARD THAT RIGHT!

Even with all the protective measures in place, **Organizations are subjected to Incidents that can have significant financial consequences**. Loss event data must be tracked, assessed, and managed as part of risk management, which contributes to risk assessment and monitoring. By addressing such incidents faster and reducing future occurrences, you can protect revenue and improve customer experiences.

Risk Central **provides incident management capabilities through** incident or event recording, triaging, investigating, tracking, and closing. In order to detect compliance or regulatory risk, incidents can be linked to organizations, processes, controls, risks, policies, and laws.

FOR EACH INCIDENT, PLAN THE APPROPRIATE RESPONSE!

Here's how Risk Central benefits you

- **Report** Loss events and other Incidents across any line of defense.
- **Receive** early warning notifications to engage managers and risk teams, and track incidents to closure.
- Amendments to update Insurance recoveries on completed losses can be updated as and when they occur.
- **Intuitive Dashboards** allow you to analyze trends.
- **Take control** of your losses as you report Incidents

How does it work?

- Events & Loss reporting workflow is business user-configurable to adapt to unique organizational requirements.
- Automated alerts and notifications are triggered to relevant stakeholders when incidents are initiated.
- Incident tasks can be categorized and managed on Action Centre based on different statuses and tracked till closure.
- Comment.
