Risk Central

AI-Powered Governance, Risk & Compliance Platform

Risk Central is GIEOM's AI-powered, low-code GRC platform for operational risk, enabling organizations to manage governance, operational and third-party risk, compliance, incidents, and resilience through unified data, workflows, and analytics.

The platform connects operational risks, third-party risks, compliance, incidents, controls, and regulatory obligations, enabling organizations to detect risks early, strengthen accountability, and enhance operational resilience.

Business Value

- Enterprise Risk Visibility
- Improved Governance
- Proactive Risk Detection
- Better Decision Support
- Operational Resilience Enablement
- Continuous Compliance Assurance
- Faster Incident Detection & Response
- Low-Code Configuration

Key Metrics Delivered

Risk assessment & Control testing performance	Compliance attestation coverage	Risk mitigation effectiveness through actions management	Faster deployment	Better reporting accuracy
ACHIEVED	ACHIEVED	ACHIEVED	ACHIEVED	IMPROVED
100%	100%	80%	75%	75%

Core GRC Capabilities

Enterprise Risk Management

- Risk identification and classification
- Risk assessments and scoring models
- Risk registers and RCSA lifecycle management
- Risk heatmaps and exposure dashboards

Compliance Management

- Regulatory obligation tracking
- Compliance assessments and attestations
- Control monitoring and validation

Incident Management

- Incident capture and classification
- Incident investigation workflows supporting root cause analysis
